REPORT OF HEALTH OFFICER

I herewith submit my report as Health Officer for the year ending January 31st, 1929.

We now have a new water system established, which has been tested once or more each month and which has been found excellent, with the exception of the last two, which showed an unfavorable condition existed, due to clay. This condition, I believe, will correct itself in time. If it does not, the wells are so arranged that they can be separately tested, and if necessary one or more can be disconnected, until such time as the trouble may be abated.

It will take some time and attention, and when that trouble we now have is abated, an excellent water system will then have been established.

The sewerage system of our town, as we all know, is very bad and must soon be looked after. I have in the past year had several complaints about toilets and town cess-pools, which I have investigated and tried to remedy, also have tried to enforce all health laws.

What few contagious diseases we have had were carefully looked after by our efficient Dr. A. W. Mitchell and thereby prevented from spreading.

In conclusion, let us continue to co-operate more and more each year, with the great object in view of making our town clean, law abiding, and a beautiful place in which to reside.

Respectfully submitted,

GEORGE A. GILMORE,

Health Officer.

That the citizens of our town may know about the child health conference held at Epping, of which I had the pleasure of attending, the following report is respectfully submitted by Eunice I. Hardy, Rockingham county maternity and infancy nurse.

CHILD HEALTH CONFERENCE

A child health conference was held in Epping, N. H., June 27, 1928, under the supervision of the State Board of Health, division of maternity, infancy and child hygiene. Dr. Abram Mitchell was the examining physician.

The total attendance at the conference was 53. There were 39 children found with defects. There were 16 children found to be 100 per cent perfect. The defects found were as follows: Adenoids and tonsils, lungs, teeth, phomosis, rickets, skin, flat feet, malnutrition, thymus gland.

The following corrections have been made during the past year:

Malnutrition 1, orthopedic 1, phomosis 10, skin 2, bow legs 3, teeth 1, adenoids and tonsils removed 5. The defects placed under treatment were lungs 1, hearing 1, glands 1.
